Take two (2) capsules two times per day or as directed by your health care professional. Take with adequate liquid. Dosage may be increased according to individual need as directed by health care practitioner.

Available in bottles of 60 capsules.

NO FILLERS / Possible soy or seafood allergies

## Bio-available essential fatty acids with dual encapsulated lipase

**Transformation's Professional Protocol BioOmegaZyme** delivers the essential fatty acids EPA, DHA and GLA in a combination of fish and borage oils. These omega 3 and 6's are well known for their health benefits to the cardiovascular, immune and neurological systems. The addition of the fat digesting enzyme lipase ensures effective digestion, absorption and delivery. Doctors are using BioΩzyme for:

- **Cardiovascular health**
- **Supporting healthy cholesterol**
- **Joint health**
- **Intolerance of traditional fish oil supplements**

BioΩzyme's innovative over-encapsulation packaging approach (U.S. Patent Pending) conveniently holds the EFAs in a liquid gelcap surrounded by an outer capsule containing lipase enzymes. This unique packaging enhances bio-availability and improves GI tolerance. The borage seed oil has been cold pressed to maintain nutritional integrity and the fish oil from sardine and anchovy has been molecularly distilled to remove harmful contaminants. The 8:1 ratio of omega 3:6 fatty acids complements a healthy diet and lifestyle.
